

ELECTRICAL

Case study

New Learning Quarter Wolverhampton College

From transformers and sub main distribution to IT and data requirements, all projects are to the highest standards, using only quality materials which conform to stringent safety regulations.

Southern & Redfern Ltd undertook the contract for the refurbishment and new build of the 3 storey college. This involved stripping out of the existing mechanical and electrical services and the installation of new services to replace the existing and new building. Mechanical and Electrical services provided were: -

Provision of new zoned heating systems to each building. Supply and extract ventilation and comfort cooling to all teaching and public areas.

Domestic services, and drainage to all teaching and public areas.

New lighting, small power, fire alarms, CCTV, access control and data provisions.
