

MECHANICAL & ELECTRICAL

Case study

Tronic Ulverston

Southern & Redfern undertook the contract for the new build of the new production and testing facility in Ulverston, Cumbria over a 12 month period. This involved the installation of new Ventilation, AC, Electrical and Security Services to the new building to suit the clients bespoke requirements.

Mechanical & Electrical Services provided were: -

- Provision of new general and specialist ventilation to all areas from new central and local plant.
- Provision of a new VRF air conditioning installation to the office and lab areas.
- New lighting, small power, fire alarms, sub mains installation, access control, CCTV, and data.
